## About This Game

Admit it — when you were a kid you used the floor, carpet, walls, bathtub and even the dirt in your backyard to race your mini cars; didn't you?

Well those days are back and this time Mom won't be yelling at you for making a mess.

Now become the natural behind the wheel you dreamed about when you were playing with your toy vehicles. MiniOne Racing is a thrilling racing game which lets players drive colorful, humorous miniature vehicles around various locations created by a kid: beach, playground... and even other planet!

I'm sorry... But no... This is pathetic... Thank god I received it with a coupon, but even with that, it's sad...

Pro:

Has trading cards

con:

The rest (it shows I played 3-4 hours, but I just kept it running for the Pro I just mentioned )

XD sAlute!. HAHAHA

This game is pretty cool, we haven't played a racing game for ages and this one caught our eye.

there are a lot of maps

it's not just racing to you can see how far you can jump and see how you compare across the world

multiplayer is awesome lol we don't like the tunnel vision ability (you will see if you play lol)

it's not a bad play :)

if you want to see Emily and Doc having a race check this out

<https://www.youtube.com/watch?v=CgibSBQubQU>. I purchased this game for my son. He loves racing games and this was the best one with easy keyboard/mouse controls and challenges to keep him happy for hours. There was a problem with the game itself playing after purchase, but the developer responded to my forum post quickly and the issue was resolved within a couple of days.

[I'm very happy with both the game and the company that produced it and I would recommend MiniOne Racing to others who want a racing game with simple controls, bright, colourful graphics, and a surprising amount of skill needed to get through some of the minigames.. why the hell did i waste my money on this crap.. Gotta go fast. A fun throwback to games like Micro Machines and RC Pro Am. It controls pretty good with a keyboard and the mini cars and pickups are all in a real toy style. The tracks are very varied and richly detailed.](#)

[I had fun playing this with little niece, if you have small kids \(or are a kid at heart yourself of course!\) this is a good purchase.](#)

[There is no controller support built in but using a mapping tool works well, although as said the keyboard controls work fine for a casual top-down view racing game like this.. Cheeky little racing game. Quite nice :3. Game doesn't work well with a controller. Race games aren't worth playing without one.. Horrible micromachine rip off game. Don't bother, there's much better alternatives on steam that aren't a waste of your time, like Toybox Turbos.](#)

[Get that instead, it's just a buck or more than this atrocity \(during the summer sale\) and well worth it.. This is a great little game. I got it to play with my young niece \( she is 5 and just getting into pc gaming \) and this is perfect. 10/10 for family for V addictive time runs.](#)
